## Example $3 \quad$ Changes in a CA Walnut Field Over 5 Days

July 5, 2021

July 10, 2021

$$
\begin{aligned}
& \text { Bare ground }
\end{aligned}
$$

## Changes in 5 days <br> Difference between vegetation stress $07 / 10$ and 07/05

Differences in vegetation stress comparing 07/10 to 07/05. Values greater than zero indicate an improvement. vegetation welfare (less stressed) values less than zero represent vegetation that is more stressed, and values near zero indicate minimal change. Basically - white is worse, tan is unchanged, and yellow or green is improved

Change in
vegetation stress from 07/05 to 07/10
